**About BEKO TECHNOLOGIES**

BEKO TECHNOLOGIES GmbH develops, manufactures and distributes components and systems for the treatment and management of compressed air and compressed gas. The independent family-owned company with headquarters in Neuss was founded in 1982.

The competence and service spectrum ranges from the treatment of compressed air and compressed gas by filtration and drying, to the proven condensate technology, to individual engineering, modern measurement technology and IoT-supported management of compressed air systems. BEKO TECHNOLOGIES advises manufacturing companies independently of their industry to find the optimal solution for their compressed air treatment and ensure compliance with the required quality and energy efficiency in the process. Social commitment and the

obligation to act in a socially responsible manner are firmly anchored in the corporate history and values of BEKO TECHNOLOGIES.

### Competences

- Product development
- Technology development
- Development of customer-specific product variants (private label & private design products)
- Manufacturing of products in a large number of variants
- Design & manufacturing of products according to customer requirements (project business)
- Services (consulting, installation/commissioning, maintenance, repair, calibration, training)

### Products & Services

- Compressed air drying
- Compressed air filtration
- Process technology
- Oil-free compressed air
- Condensate technology
- Measurement technology
- Service
- Trainings
- Systems

### Industries & reference customers

<i><b>Industries</b></i>	<i><b>Reference Customers</b></i>
Food industry	Nestlé, Brandt, Klosterfrau, Meggle, Rheinfelsquelle, Lavazza
Pharmaceutical industry	Pfizer, Nycomed
Chemical industry	BASF
Medical and laboratory technology	Universitätsklinikum Bonn, Laserforschungszentrum CALA
Automotive industry	Mercedes-Benz, Audi, Hella

### Number of employees (active)

	<i><b>31.12.2022</b></i>	<i><b>31.12.2023</b></i>	<i><b>31.12.2024</b></i>
BEKO TECHNOLOGIES GmbH	323	347	351
BEKO company group	612	643	663

### Economic development

	<i><b>2022</b></i>	<i><b>2023</b></i>	<i><b>2024</b></i>

Capital expenditures [million €]	3,1	2,8	3,18
Equity ratio [%]	53,1	54,4	52,0

### Quality Management

BEKO TECHNOLOGIES GmbH	Certified quality management system since 1994 (currently ISO 9001:2015)
Manufacturing locations	Certified according to ISO 9001:2015 All production sites control their QM system under their own responsibility. Central specifications and monitoring are carried

	out by the head of quality management at the main plant in Neuss.
Head of Quality Management	Christian Riedel Phone: ++492131 988- 431 christian.riedel@beko-technologies.com

### Environmental protection

WEEE-Reg.-Nr.	DE 86830482
---------------	-------------

### Occupational safety

BEKO TECHNOLOGIES operates an occupational safety system in accordance with the occupational safety regulations in force in Germany. The external monitoring is carried out in a dual system by the state labor inspectorates or offices for occupational safety and the institutions of the statutory accident insurance (employers' liability insurance associations and accident insurance funds in the German Statutory Accident Insurance DGUV). The latter issue accident prevention regulations that constitute binding law.

In addition, compliance with occupational health and safety regulations is monitored externally as part of the audits of the QM system in accordance with ISO 9001:2015.

Responsible trade supervisory office:	Düsseldorf District Government		
Responsible trade association:	BG ETEM		
Company number & Membership number:	9187 2388 7508 001		
Occupational safety specialist:	Joel Goldberg
